

Xanthan Gum Slurry

4 lb/ga

Use:

Xanthan Gum Slurry is suspension of high quality Xanthan Gum in a Mineral Oil and is used as a viscosifier in hydraulic fracturing, coiled tubing and drilling operations and is the preferred viscosifier due to its rapid hydration and the fact that by using slurry potentially damaging fish-eyes are not formed.

Physical & Chemical Properties:

Parameters	Specifications
Appearance	Light Cream, Liquid
Viscosity @ 5 mins*	100
Odor	Mineral Oil

*12 ga Xanthan Slurry per 40 bbl fresh water tested with a Marsh Funnel

Compatibility:

Compatible with known fracturing, coiled tubing and drilling fluids. A compatibility test is always recommended.

Environment:

Not hazardous to the environment.

Typical Dosage:

Depending on application, from 1 gpt to 20 gpt.

Temperature Limitations:

Can be used across a wide temperature range, no lower temperature limitation on performance. Has been effectively used up to BHT of 350 F.

Packaging:

330 ga one way totes, 275 ga one way totes, 55 ga drums and bulk tank trucks

Availability:

Pleasanton, TX; Beasley, TX and Midland, TX

DoT Classification:

Not Regulated
